EXPERIENCE

NNC Communications Jos — *Frontend developer*

May 2021 - September 2022

- Started as an intern of frontend development, built responsive interfaces for both web and mobile screens.
- Advanced to Junior frontend developer, integrated faster consumption and rendering for APIs from the server side and also reducing application memory consumption..

Bluehouse technologies, Jos — *Backend Developer*

January 2024 - January 2025

- Started as an intern for backend engineering, collaborated with the senior backend engineer to build server side applications for several clients using multiple frameworks of backend engineering.
- Advanced to the Mid Level Backend Engineer, and headed the team to handle several projects by modifying the microservice architecture which led to over 40% improved performance.
- Wrote and enforced writing of unit, e2e, and integration tests to ensure software quality, and detect bugs right in development.

Consolidated Energies, Nigeria— *Backend Developer*

December 2024 - Present

- Worked as a team member with a team size of over 5 and successfully launched an electricity and data vending platform cellpay.ng.
- Revamped the architecture of the product from nodejs to nestjs in order to promote the maintainability and also enhance typescript support for scalability.

Scousity , Nigeria— *Backend Developer*

Contract staff

- Worked as a team member developing the server side of the social media platform, improving system performance by breaking the data load from the database.
- I also used Docker for containerization and enhancing system scalability.

EDUCATION

Federal University of Technology, Minna — Computer Science (Btech)

2019 - 2025

SKILLS

Languages: Javascript, Typescript, NodeJS, Python.

Frameworks/Libraries: React, NextJS, NestJS, Express, Tailwind, Bootstrap, Chakra,

Tools: Git, Github, Docker, Linux, Slack.

Databases: MongoDb, MySql, Postgresql, FireBase

Concepts: OOP, Functional Programming, Rest APIs, GraphQL APIs, Microservices, Containerization, CI/CD, Testing,

AWARDS

Google Developer Students Club GDSC Futminna : Best performing core team member 2022/23 session

Google Developer Students Club GDSC Futminna: Hackathon winners 2022/23 session (Voteazy, an online voting system for the nigerian electoral system)

LANGUAGES

English(Native), Hausa(Fluent), Pan(Medium)
